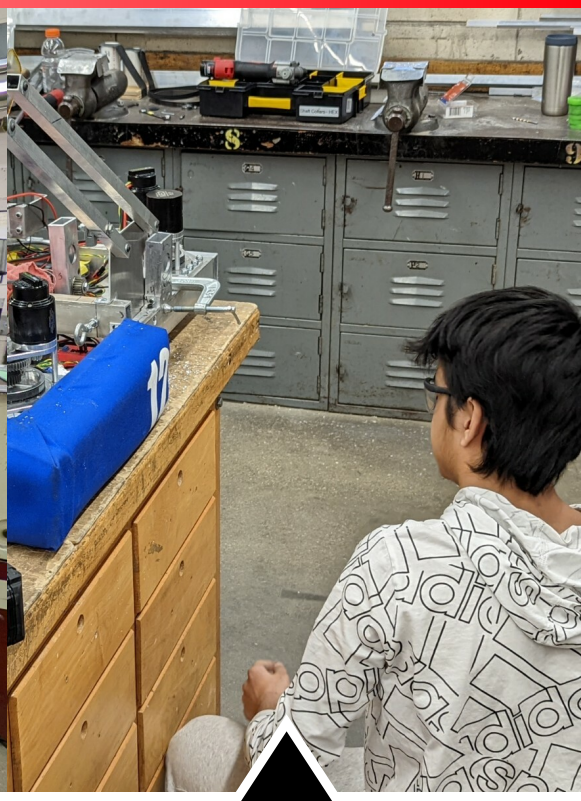
PARADIGMSHIFT
PEWAUKEEROBOTICS

Date: 3/21/2022



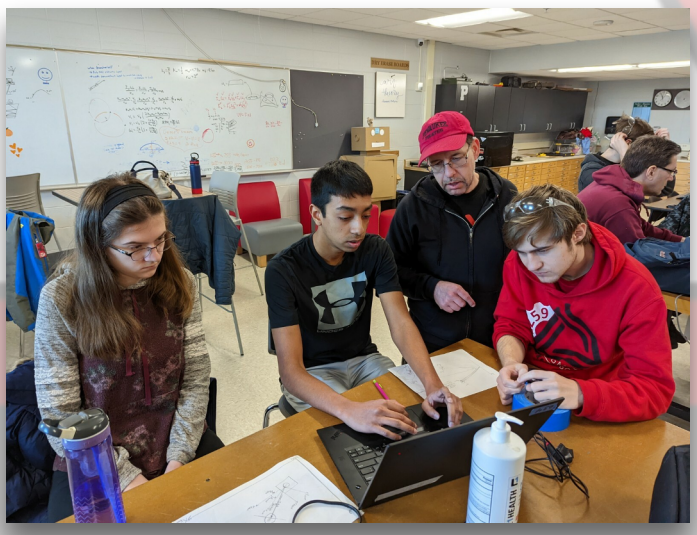
Wisconsin Regional

Team 1259 is going to the Wisconsin Regional! From March 23 to March 26, we will compete at the UW-Milwaukee Panther Arena. Come see us! Spectators are allowed with a completed waiver that you can find here. In addition, parking information can be found here. Alternatively, you can find details about watching matches online here. Make sure to check out the event schedule!

PARADIGMSHIFT
PEWAUKEE ROBOTICS

Week 10 Subteam Updates

The build team made final touches on the new intake and shooter systems so that the code team can work on making sure everything works correctly. They have also started production of spare parts. The robot is physically in good shape for the Wisconsin Regional! The code team has been busy with the robot's positioning. A good sense of position is important for the autonomous period and for the shooter when the drivers control the robot. They have also been refining and adding to the functionality of the robot's vision so we can shoot well.

Chairman's


The Awards Team is hard at work updating our Chairman's Award presentation for the Wisconsin Regional. The Chairman's Award recognizes a team for exhibiting FIRST's core values extremely well. In our presentation, we include ways in which we have benefited our community and the people around us through those core values. The Wisconsin Regional's Chairman's judging will be done in person! Good luck to everyone involved!
