

## 2020 Season Recap

Last season was a great one with an unfortunate ending.

- The team worked hard to manufacture a robot throughout the season to compete in the Infinite Recharge event. **We are grateful that we were able to still compete at the Northern Lights Regional in Duluth** prior to the season getting canceled.
- The Northern Lights Regional went well. With 60 teams participating, **we made it to the semifinals after being picked by the 4th seeded alliance, where we nearly defeated the 1st-seeded alliance.**
- Although this was our only competition, due to COVID-19 concerns, we ended on a high note by **winning the Gracious Professionalism award for the help we gave to other teams!**

## Volunteering & Outreach

The robotics team participated in the second part of Sydney G's Girl Scout Gold Award Project. In June, the team put together two Gaga ball pits at parks located in Pewaukee. We worked with Sydney to take apart the Gaga ball pits and reassemble them into an ice skating rink at Kiwanis Village Park. Our team had five volunteers who helped with the project in November. When it is cold enough for the water to freeze, the ice skating rink will be filled with water and put to use for ice skating.

## FIRST Lego League Update

(Photo taken pre-COVID)

Our team has been helping out providing volunteers to the FLL teams in our district.

- These meetings started virtually in August as the FLL students use the EV3 and Spike Prime kits to tackle the new challenge
- These teams have students ranging from 4th grade to middle school
- The 4 teams will start meeting in person by mid-November while following safety protocols
- We are excited to continue mentoring these students and inspiring creativity and innovation within the kids of the future!

## FIRST COVID-19 Update

This year has been different. Although subject to change, due to all the ongoing concerns about COVID-19, the **FIRST organization has decided to err on the side of caution and cancel all in person competitions.** As a way to maintain the spirit of FIRST, while abiding by safety regulations, **FIRST will be holding virtual competitions known as INFINITE RECHARGE at Home.** These competitions will offer teams a way to showcase the skills of their robot while competing with other teams virtually.
